ANSA. ANSA is the culmination of over 30 years of research in the CAE field. The implementation of novel concepts such as topology and geometry abstraction initiated its current course of adoption in the CAE industry. Although ANSA started in the Automotive industry, it is now widely used across many industries in all aspects of model preparation.

One of ANSA's primary benefits is the ability to trim an imported surface mesh along a curve; particularly important when working with meshes created in segmentation software. Furthermore, the support of ANSA by BETA CAE is wonderful. Our questions have been answered quickly, clearly, and thoroughly.
