Biodiversity and Landscapes : A Paradox of Humanity (2009 ...

The people-biodiversity paradox is also evident within the literature examining individual's landscape preferences and attitudes toward biodiversity. For example, when investigating attitudes toward field margins in Swiss agricultural landscapes, Junge and colleagues (2009) found that people expressed a greater appreciation for margins where they estimated plant species richness was higher.

Over 30 years ago the wattle (specifically *Acacia pycnantha*) was declared the official Australian national floral emblem. With its striking golden flowers peeking through the brown Australian bush, the wattle cemented itself on the Australian coat-of-arms, and on the backs of our greatest athletes. However, there is more to Australian wattle than meets the eye,...
