Biological Weapons From The Invention

Guillemin's account of biological weapons is lucid and concise, providing an excellent guide through the evidence on the past and issues for the future. -- Lawrence D. Freedman, Foreign Affairs Jeanne Guillemin presents a cogent history of biological warfare and its horrific implications -- Karl Helicher, ForeWord

Amazon.com: Biological Weapons: From the Invention of ...

While US field tests of biological weapons were reaching new heights of realism, political forces were at play that would make all offensive biological weapons programs illegal. The era of legitimate state retaliation in kind, begun by the French in the 1920s, ended with President Nixon's 1969 renunciation of biological weapons for the US and with the 1972 Biological Weapons Convention.

Biological Weapons: From the Invention of State-Sponsored ...

The lack of use of biological weapons in war was not for want of great effort and enormous funding invested in state programs. Advocates for using biology to create a new class of weapons initially envisioned delivery systems for pathogenic aerosols that mimicked those for chemical weapons, which were mainly bombs that generated aerosols intended to kill or disable troops in a local area.

Biological Weapons: From the Invention of State-Sponsored ...

A classic on Biological Weapons, Dr. Guillemin presents an excellent introduction to the topic. In addition to being a fantastic primer on the history of biological weapon development, the emphasis on the American

inclination towards technological solutions to national security threats touch upon bigger themes in the literature.
