Bomb Risk satisfies CIRIA C681's guidelines for dealing with UXO risk. Unexploded ordnance (UXO) risk management is a key part of the planning process for any construction, development or infrastructure project in the UK. CIRIA C681 UXO guidelines set out four stages for managing this risk. The chart, below, gives a brief overview of the four stages, and poses questions that need to be answered in order to progress through the UXO risk management process.
