United Nations Statistics Division -
Environment Statistics. The Basic Set of
Environment Statistics is a
comprehensive, but not exhaustive, set
of statistics designed to support
countries developing national
environment statistics programmes by
helping them make decisions on
priorities for statistical development.

UNSD — Environment Statistics

UNSD Environmental Indicators
disseminate global environment
statistics on ten indicator themes
compiled from a wide range of data
sources. The themes and indicator
tables were selected based on the
current demands for international
environmental statistics and the
availability of internationally comparable
data.
