TECHNICAL GUIDE Description - HVAC Tech Support

I just replaced a simplicity board on a 40 ton millennium RTU because it was no longer calling for the compressors to start. The board goes through a Bacnet MSTP translator and is mapped into a Metasys front end. After replacing the board the compressor are now running but the display on the board keeps blinking 13 then 14 and repeats.

YORK® Commercial Equipment - Proven Performance. Trusted in the world's most prestigious buildings for over 145 years, YORK® commercial HVAC systems deliver performance that runs more efficiently in real-world conditions and that come standard with world-class service and support.

Commercial Equipment | YORK®

nuisance calls, the control board uses a three times, you're out philosophy. The high, low-pressure switch, anti-freeze protection, low voltage or heating hi gh limit must trip three times within two hours before the unit control board will lock out the associated compressor. The same safety must trip three times before a hard lockout will occur.
